Animal Genetics:

Cattle: effects of climate on performance, 47; physiological approaches to climatology, 52; influence of high temperature on reproduction, 62; effects of high temperatures on milk production, 65; effects of high temperatures on growth and fattening, 69; improving environment in high temperature areas, 75; climatic problems in relation to breeding, 80; albino-dwarfism in Herefords, 111; scurs in a herd of Aberdeen-Angus, 117; congenital porphyria in Holstein-Friesian, 125; spotting in Holstein-Friesian, 139; curved limbs, 229; Red Dane and Milking Shorthorn crossbreds, 243; doddler—a nervous disorder in Herefords, 250.

Drosophila: DDT-resistance, 22; reoccurrence of forgotten homeotic mutant, 262

Fish: spinal curvature in the swordtail, 238; albino catfish, 284.

Fowl: sex-reversal and abnormal sex ratios, 102; coloboma of the iris, 107; modification of the "double-cross" techniques of breeding, 110; *Gallus sonnerati* and the domestic fowl, 167; tremor in ducks, 214.

Hamster, three coat-color factors, 181.

Honey Bee, linkage studies, 99.

Livestock: effects of climate on performance, 47; physiological approaches to climatology, 52; influence of high temperature on reproduction, 62; effects of high temperatures on milk production, 65; effects of high temperatures on growth and fattening, 69; improving environment in high temperature areas, 75; climatic problems in relation to breeding, 80.

Mice: crinkled-fuzzy, 8; variations in polydactylism, 33; endocrine variation, 143; mutation affecting blood formation, axial skeleton and body size, 153; orange-tan, a recessive in deer mice, 189; absence of differential mortality of sexes, 217; sex ratio related to sperm source, 223; abnormal myelin and leukopenia in the wabbler-lethal, 233.

Rat, sex ratios and litter size, 303.

Sheep, effects of high temperatures on growth and fattening, 69.

Swine: effects of high temperatures on growth and fattening, 69; sex chromatin of intersexes, 199; sex anomalies, 255.

Asynapsis in Red Clover, W. J. Whittington, 202.
